\LaTeX Beamer

LaTeX Beamer is a powerful tool to create presentations

Introduction

\LaTeX Beamer

LaTeX Beamer is a powerful tool to create presentations

Export to PDF

It produces platform-independent presentations in PDF

Outline

1 Slides with text

2 Images

3 Math

This is block

Using *blocks* is a handy way to present your text

Blocks

This is block

Using *blocks* is a handy way to present your text

Pause between

You can also insert a pause between blocks

Simple text

This is a simple text

Simple text

This is a simple text

- This is a text with bullet point

Simple text

This is a simple text

- This is a text with bullet point
- And another one

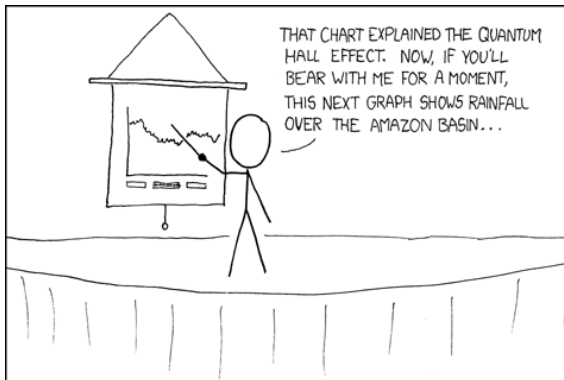

Outline

1 Slides with text

2 Images

3 Math

You can also include images to your slides

IF YOU KEEP SAYING "BEAR WITH ME FOR A MOMENT",
PEOPLE TAKE A WHILE TO FIGURE OUT THAT
YOU'RE JUST SHOWING THEM RANDOM SLIDES.

Outline

1 Slides with text

2 Images

3 Math

You can use all math power of LaTeX easily doing something like this:

$$\int_a^b (\alpha f(x) + \beta g(x)) dx = \alpha \int_a^b f(x) dx + \beta \int_a^b g(x) dx$$

Have a good luck with \LaTeX Beamer!
